

Mānuka Packaging Specification & Approval Checklist

Two-page buyer worksheet for controlling jar, closure, liner, tamper evidence, label fit, net quantity, case pack and packaging approval status.

Packaging control	Required specification	Evidence / sample	Owner	Status
Jar	material, colour, capacity, dimensions, finish			OPEN
Closure	material, colour, finish / thread			OPEN
Liner / seal	type, contact surface, application			OPEN
Tamper evidence	feature and verification method			OPEN
Label zone	dieline, orientation, safe area			OPEN
Net quantity	declared mass + measurement control			OPEN
Case pack	units, carton, protection, dimensions			OPEN
Pallet / dispatch	configuration if in scope			OPEN

Status discipline

Use OPEN/HOLD until the required evidence is actually reviewed. A planning worksheet should not convert an assumption into a confirmed supplier, laboratory or market fact.

Page 2 · Packaging approval and substitution control

Assembled sample

Has the real jar + closure + label/tamper system been approved?

Food contact

Is suitability documented for the intended food/use?

Seal integrity

What verifies closure/liner performance?

Artwork fit

Does the final label fit the production jar and stay legible?

Substitution

Who can approve a component change and what must be rechecked?

Case pack

Does secondary packaging protect the pack and fit logistics needs?

Decision record

Decision	Owner	Date	Notes / evidence reference

Editorial note

This worksheet is general procurement guidance. It is not legal advice, a supplier quotation, a certificate, a laboratory result or a guarantee of export clearance. Recheck destination requirements and transaction evidence before use.
